Place your API order now!

Visit us to learn why you should source your recombinant protein needs from us!

- 
- + TPI innovations include proprietary bioreactors and downstream systems to allow manufacturing at a competitive cost globally.
- + TPI is located within the University Technology Park of the Illinois Institute of Technology, developed by Wexford Science and Technology.
- + Outsource your recombinant protein needs.
- Save capital cost for separate buildings and equipment—as now required by regulatory agencies.
  - Avoid ongoing regulatory testing to maintain biological certification.
  - Stay competitive through the efficiency of our proprietary patented technologies.
- + Outsource your biosimilar API needs to TPI.
- TPI has the same quality standards as the innovator companies.
  - TPI is regularly inspected by FDA, safeguarding your regulatory status.
  - TPI's proprietary patented technologies assure same quality for each shipment.
  - TPI can supply comprehensive regulatory documentation for specific needs.
  - TPI is located in the US and would provide a US COA that might help your international sales.
  - Each TPI batch is tested by an independent certified laboratory.
  - Differentiate your product with innovator quality at a competitive price.
